

Submersible Sewage Water Pump

This submersible sewage pump is suitable for dirty water. It is designed for efficient drainage and irrigation.

Product Overview

Submersible Sewage Pump Overview

This submersible sewage pump is engineered for efficient drainage and irrigation applications. Its robust design features a durable cast iron body combined with stainless steel components, ensuring reliability in demanding environments. Equipped with a semi-open impeller and thermal overload protection, it is capable of handling solids while maintaining operational safety.

Technical Specifications

Performance Metrics

0.33 HP

Power Output

1.8 A

Rated Current

2 m

Maximum Head

Electrical Data

Parameter	Value
Voltage	450 V
Frequency	50 Hz

Construction & Materials

Material Specifications

- Motor frame: Stainless Steel
- Pump body: Cast Iron
- Top cover: Cast Iron
- Impeller: Cast Iron (Semi-open type)
- Shaft: SS304 Stainless Steel
- Mechanical seal: Ceramic/Graphite

Key Features

Thermal Overload Protection, Submersible, Solids Handling

Installation Requirements

Outlet Size	1.5 inches
