Product Overview

Efficient Submersible Sump Pump

This submersible sump pump is engineered for reliable water removal in both residential and light commercial settings. It features a durable stainless steel housing and wear-resistant components, ensuring longevity even in demanding environments. With an integrated float switch for automatic operation and a compact design, it is ideal for draining basements, sumps, and confined spaces efficiently.

Technical Specifications

Motor Frequency	50Hz
Power Options	1 Phase, 3 Phase
Thermal Protection	Yes

Design & Construction

Build Materials

- Stainless steel housing
- Thermoplastic base
- Wear-resistant shaft
- Wear-resistant impeller

Outlet Orientation	Vertical
Seal System	Double seal system

Operational Features

Operation Modes

Automatic (Float Switch) • Manual

Suitable For	Clean Water, Dirty Water, Basements, Sumps
