Overview

Professional Submersible Water Pumps

These submersible water pumps are engineered for reliable performance in clean water applications, including irrigation, gardening, and tank emptying. Designed for continuous duty operation, they feature robust insulation and ingress protection to ensure durability in demanding environments. Available in multiple power configurations, these units offer an efficient solution for automated water management.

Performance Metrics

Performance Overview

165 L/min
Max Flow Rate

10 m
Max Head

2860 r/min
Rotation Speed

Technical Specifications

Electrical Requirements	220V, 50Hz
Ratings & Standards	CE, CL.B, IP68
Duty Cycle	Continuous Duty

Model Variants

Available Pump Models

Model	Power (W)	Power (HP)	Max Head (m)	Flow Rate (L/min)
QDS-370C	370	0.5	8	120
QDS-550D	550	0.75	10	165
QDS-750A	750	1	10	135
