

Submersible Water Pump

This submersible pump is designed for efficient water removal in various applications. Its robust construction ensures durability and reliable performance in demanding environments.

Product Overview

High-Efficiency Submersible Solution

This submersible water pump is engineered for reliable water removal across diverse industrial and residential applications. Featuring a robust stainless steel housing, it offers superior corrosion resistance and durability in demanding environments. The integrated automatic float switch ensures optimal operation and prevents dry-running damage, making it ideal for drainage, irrigation, and general water transfer.

Technical Specifications

Housing Material	Stainless Steel
Key Features	Stainless Steel Housing, Corrosion Resistant, Automatic Float Switch, Dry-Running Protection

Applications

Primary Applications

- Water Drainage
- Agricultural Irrigation
- General Water Transfer
