

# Submersible Water Pump 550W

This submersible water pump is designed for drainage applications. It operates on 220V and delivers 550W of power with a maximum flow rate of 1200 liters per minute.

## Overview

### Submersible Water Pump 550W

This submersible water pump is engineered for reliable performance in clean water environments. Designed for versatility, it is an ideal solution for domestic tasks, garden maintenance, irrigation projects, and tank drainage. Its robust construction ensures ease of use and long-term reliability for various professional and residential applications.

## Performance

### Power Output

**550 W**

Power

**0.75 HP**

Horsepower

Maximum Flow Rate 1200 L/min

Maximum Head 8 m

## Technical Specs

Voltage/Frequency 220V / 50Hz

Pump Speed 2160 r/min

Protection Class IP68

## Features

### Operational Features

- Automatic operation
- Continuous duty

Certifications CE
