Product Overview

High-Efficiency Submersible Drainage Pump

This QDX-K3 submersible drainage pump is engineered for high-performance water removal in demanding environments such as construction sites and flooded areas. It features a compact, corrosion-resistant design that facilitates easy installation in confined spaces while maintaining robust flow rates. Equipped with built-in thermal overload protection and a clog-resistant impeller, this unit offers reliable, long-term operation for various water management tasks.

Technical Specifications

Suitable Applications

- Draining flooded areas
- Construction site dewatering
- Swimming pool drainage
- General water transfer

Performance Metrics

3 K-Series

Model Series

Key Operational Features

Thermal Overload Protection, Corrosion-Resistant Construction, Clog-Resistant Impeller, Automatic Float Switch
