

Submersible Water Pump for Irrigation and Drainage

This submersible pump is designed for drainage and irrigation purposes. It features robust construction for reliable operation in demanding environments.

Product Overview

Professional Submersible Pump

This high-performance submersible pump is engineered for demanding irrigation and drainage applications across agricultural, industrial, and domestic sectors. It features a robust, corrosion-resistant construction that ensures long-term reliability even in challenging environments. Designed for efficiency and ease of installation, this unit delivers consistent performance for fluid management tasks.

Technical Specifications

Model Number	40QJD2-22-0.75
Power Output	0.75 KW
Rated Current	3.7 A
Voltage/Frequency	220V-50HZ

Performance Metrics

Operational Metrics

2 m³/h

Flow Rate

22 m

Head

Features

Suitable Applications	Agriculture, Industrial Drainage, Domestic Irrigation
