

Submersible Water Pump with Float Switch

This submersible pump is designed for efficient water removal in various applications. Its robust construction ensures durability and reliable performance.

Product Overview

Professional Submersible Water Management

The Q1DP-G submersible pump is engineered for high-efficiency water removal in professional and industrial settings. Its compact, robust construction allows for reliable operation in confined spaces, while the integrated float switch provides automated, worry-free management by preventing dry running. Equipped with thermal motor protection and a design optimized for handling suspended solids, this pump serves as a durable and cost-effective solution for demanding water drainage tasks.

Technical Specifications

Key Performance Indicators

1 Automatic

Operation

1 Yes

Thermal Protection

Key Features

- Integrated float switch for automatic operation
- Dry-running protection
- Thermal motor overload protection
- Compact design for confined space installation
- Solid handling capability for dirty water

Certifications & Quality

Quality Standards

Thermally Protected, Dirty Water Compatible
