

Submersible Water Pump with Float Switch

This submersible pump is designed for efficient water removal in various applications. It is equipped with a float switch for automatic operation, starting and stopping based on water level.

Product Overview

Reliable Water Management Solution

The Q1DP-E2 submersible pump is engineered for efficient water removal in diverse environments such as cellars, garages, and swimming pools. Featuring a robust motor and durable construction, it provides long-lasting, reliable performance. The integrated float switch enables seamless automatic operation, ensuring the pump starts and stops according to the water level for optimal convenience.

Key Features

Operational Highlights

- Automatic float switch for water level control
- Compact and portable design for easy installation
- Energy-efficient operation
- Low-maintenance construction

Applications

Suitable Environments

Cellars, Garages, Swimming Pools, Flood Prevention
