

Surface Mount LED Light

This LED light features a compact design with multiple surface-mount LEDs arranged in rows for efficient illumination. It includes a clear plastic housing, a circuit board with electronic components, and two pins for electrical connection.

Product Overview

Surface Mount LED Light

This surface-mount LED light is engineered for efficient and reliable illumination. Featuring a reasonable arrangement of high-quality chips paired with a premium PC mask, it delivers a soft, consistent light output. The design includes a bridge rectifier, allowing for versatile AC operation in various electronic applications.

Technical Specifications

Key Components

- Surface-mount LEDs
- PC Mask
- Circuit Board
- Bridge Rectifier

Power Compatibility	AC
Voltage Rating	22 V
Design Features	Surface Mount, Bridge Rectifier, Compact Design
