

Surface Mount Top LED

This surface mount LED is designed for top-side mounting. Its compact form factor is suitable for automated assembly processes.

Product Overview

Professional Surface Mount LED Solution

This surface mount LED is specifically engineered for high-efficiency top-side mounting configurations. Its compact form factor is optimized for modern automated assembly processes, ensuring high-speed integration into electronic circuits. The component provides exceptional luminous efficacy and an extended operational lifespan, making it a reliable light source for demanding professional lighting applications.

Technical Features

Construction Details

- Surface mount design for top-side mounting
- Compact form factor
- Durable materials for thermal stability

Performance Highlights

High Luminous Efficacy, Long Operational Life, Automated Assembly Ready, Enhanced Thermal Management, Environmental Resistance
