

Surround Sound Speaker System

This speaker system delivers high-fidelity surround sound. It includes five satellite speakers and a central unit with a built-in display and connectivity ports.

Product Overview

High-Fidelity 5.1 Surround System

This 5.1 channel HI-FI surround sound system is engineered for a premium audio experience with full frequency design. It combines powerful deep bass with clear satellite output, all managed by an integrated amplifier. With convenient features like an LCD display and remote control, this system provides versatile input control for professional environments.
