

Surveying Instrument Tripod with Adjustable Legs

This precision instrument tripod is designed for geological exploration and surveying applications. It features adjustable legs for leveling on uneven terrain and a secure mounting platform for surveying equipment.

Product Overview

Professional Surveying Instrument Tripod

This precision instrument tripod is engineered specifically for demanding geological exploration and surveying applications. It features robust, adjustable legs that ensure stable leveling even on challenging, uneven terrain. Designed for durability in field conditions, it provides a secure mounting platform for essential surveying equipment such as total stations and levels.

Key Features

Compatible Instruments

- Total Stations
- Surveying Levels
- Precision Optical Instruments

Applications

Geological Exploration, Land Surveying, Construction Site Leveling

Design & Build

Build Quality

Field-Ready • Durable Construction

Leg Adjustment

Yes
