

Synchronizer Ring 42 Teeth 100.5mm Diameter

This synchronizer ring has 42 teeth and an outer diameter of 100.5mm. It has a net weight of 0.34kg and is used in machinery and industrial applications.

Product Overview

Precision Synchronizer Ring

This high-quality synchronizer ring is engineered for demanding industrial machinery applications. It features a robust design with 42 precision-cut teeth and an outer diameter of 100.5mm. Designed for reliability, this component ensures smooth engagement and optimal mechanical performance in heavy-duty systems.

Technical Specifications

Net Weight

0.34 kg

Net Weight

Number of Teeth	42
Outer Diameter	100.5 mm
Reference Identification	SA-1032, ME-10

Usage Information

Industrial Applications

- Industrial Machinery
- Mechanical Transmission Systems
