

Synthetic Fiber Round Sling

This round sling is made from high-quality synthetic fiber using advanced weaving equipment and processing technology. It features a protective sleeve and offers a safe, lightweight lifting solution.

Product Overview

Professional Lifting Solution

This synthetic fiber round sling is engineered for demanding heavy-duty lifting applications in construction, manufacturing, and rigging environments. The high-strength synthetic core provides exceptional load-bearing capacity, while the durable protective cover ensures longevity and resistance against wear. Its flexible design allows for versatile lifting configurations, ensuring a secure and reliable attachment point for heavy loads.

Key Performance Metrics

Performance Specifications

8000 KG

Working Load Limit

2 M

Length

Technical Details

Standards

Industry Safety Standards Compliant

Suitable Industries

- Construction
- Manufacturing
- Rigging Operations

Material Composition

Synthetic Fiber, Protective Sleeve
