

T-Profile PVC Seal with Central Groove

This is an extruded PVC seal with a T-shaped profile and a central groove. It is ideal for machinery, enclosures, and other industrial applications requiring a robust and effective seal.

Product Overview

Professional T-Profile Sealing Solution

This high-performance T-Profile PVC seal is engineered for robust industrial sealing applications. Featuring a specialized central groove, it offers enhanced flexibility and superior compression to ensure a tight, reliable fit within machinery and enclosures. Its durable construction is designed for long-term use in demanding environments where precise sealing is critical.

Technical Specifications

Material Composition	Durable Flexible PVC
Profile Shape	T-Profile with Central Groove
Core Features	Flexible, Industrial Grade, T-Shape, Compression Sealing

Application

Recommended Use Cases

- Industrial Machinery
- Protective Enclosures
- Panel Gaskets
- Custom Channel Sealing
