

# T-Shank Jig Saw Blades for Wood

These jig saw blades are made from high-carbon steel and are designed for cutting wood. They feature a T-shank mount, optimized tooth geometry, and are suitable for straight and curved cuts in various wood types.

## Product Overview

### High-Performance Wood Cutting

These high-carbon steel jig saw blades are engineered for precision and efficiency when cutting various types of wood. Featuring a universal T-shank mount, they offer broad compatibility with most standard jig saws. Designed to handle both straight and curved cuts, these blades provide clean results for professional and DIY woodworking projects.
