

Tableware Shrink Wrapping Machine

This tableware shrink wrapping machine efficiently packages tableware sets using a heat shrinking process. It tightly wraps the tableware, providing protection and a professional presentation suitable for various sizes and shapes.

Overview

Professional Tableware Shrink Wrapping Solution

This advanced shrink packaging machine utilizes a specialized air-jet principle to deliver efficient, high-quality results for tableware sets. Designed to save energy by over 15% compared to traditional models, it ensures a tight, professional wrap while avoiding common folding issues. The unit is highly adaptable, supporting various shrink films including PVC, POF, and PP, making it a versatile choice for commercial packaging needs.

Technical Specifications

Voltage	220v/380v
Power Consumption	8 KW
Maximum Load Capacity	10 KG
Weight	90 KG

Performance

Performance Metrics

10 m/min

Max Transmission Speed

15 %

Energy Savings

Dimensions

Dimensions

Component	Size (mm)
Furnace Size	900*450*250
Overall Dimensions	1200*610*1240

Compatibility

Supported Film Types	PVC, POF, PP
----------------------	--------------

Configuration

Transportation Options

- Belt type
- Chain type
