Product Overview

High-Capacity Filtration Solution

This take-apart filter drier shell is designed for use in refrigeration liquid and suction line systems, providing essential protection by removing moisture and contaminants. Featuring a modular design, it allows for the installation of replaceable filter cores to accommodate systems with varying capacity requirements. Built for durability and performance, these shells ensure optimal system longevity and efficiency.

Technical Specifications

Maximum Working Pressure

500 PSIG
MWP

Available Series

- 48 Series
- 100 Series

Certifications

CE

Compatible Refrigerants

R12, R22, R134a, R410A, R404C, R404a, R502, R507

Material

Steel

Country of Origin

China
