

Tapered Roller Bearing

This tapered roller bearing is designed for high load capacity and smooth operation. It features a robust construction with a hardened steel cone and cup, ensuring durability and long service life.

Product Overview

High-Performance Tapered Roller Bearing

This tapered roller bearing is engineered for exceptional load capacity and smooth, reliable operation in demanding environments. Constructed with a hardened steel cone and cup, the unit is built for durability and an extended service life. It serves as an ideal component for a wide range of applications across automotive, industrial, and agricultural machinery sectors.

Technical Specifications

Performance Features

- High load capacity
- Smooth operation
- Durable construction
- Long service life

Bearing Type	Tapered Roller Bearing
Construction Materials	Hardened Steel Cone, Hardened Steel Cup

Applications

Primary Applications

Automotive • Industrial Machinery • Agricultural Machinery
