Product Overview

Professional Precision Cutting

This high-performance Tungsten Carbide Tipped (TCT) circular saw blade is engineered for precision and durability in demanding work environments. Featuring an Alternate Top Bevel (ATB) tooth geometry, it ensures exceptionally clean and efficient cuts across a variety of materials. It is fully compatible with standard electric saws and power tools, making it an essential component for professional woodworking and industrial cutting applications.

Technical Specifications

Maximum Rotation Speed

6600 r/min

Maximum RPM

Blade Diameter 230 mm

Maximum Cutting Speed 80 m/s

Compliance & Quality

Certifications ISO 9001, ISO 14001, MPA 90304, MPA 90305
