Product Overview

Precision-engineered sharpener for consistent TCT blade maintenance.

Professional TCT Saw Blade Sharpening

This manual circular saw blade sharpener is engineered for the precision grinding of hard alloy saw blades. It features a versatile, adjustable plate system that accommodates various blade diameters and tooth counts, allowing for precise control over grinding angles and tooth profiles. Built for professional environments, this machine helps maintain original cutting performance or allows for custom angle changes to suit specific material requirements.

Technical Specifications

MRCM 美日 机床
MIRAI MACHINE TOOLS

CE

Specialized accessory for enhanced blade cutting performance and longevity.

Model	MR-Q10
Compatible Blade Diameter	60 - 400 mm
Motor Power	250 W
Sharpening Speed	45 teeth/min

Dimensions and Weight

Dimensions	62 x 62 x 72 cm
Machine Weight	60 kg

Compliance and Standards

Quality Certifications	CE
