

Telescopic Radio Antenna

This is a telescopic antenna with a cylindrical base and a telescopic rod. It is designed for receiving radio signals and mounting on a vehicle or other equipment.

Product Overview

Versatile Telescopic Antenna

This telescopic radio antenna is engineered for reliable signal reception in various applications. Featuring a durable silver rod and a robust black cylindrical mounting base, it is designed for secure installation on vehicles or specialized equipment. The unit includes a ridged mounting base with a side protrusion for enhanced stability and precise positioning.

Design & Build

Antenna Type

Telescopic • Radio Reception

Model Identifier

J8A-515

Mounting Configuration

Vehicle/Equipment Mount

Construction Materials

Metal, Plastic
