

Telescopic Vehicle Antenna

This product is a telescopic antenna designed for vehicles and other electronic devices. Its adjustable length allows for optimal signal reception, and it mounts easily on any surface.

Product Overview

Versatile Signal Reception

The JBA-502 is a high-quality telescopic antenna engineered for reliable signal reception in mobile environments. Its adjustable design allows for precise length control, ensuring optimal performance for various communication needs. Featuring a durable black finish and a reinforced base, this unit is built for secure mounting and long-term stability on vehicle surfaces.

Physical Specifications

Model Number	JBA-502
Color	Black
Design Type	Telescopic

Features

Installation	Surface Mount
Compatibility	Vehicle, Electronic Device, Mobile Communication
