Product Overview

Precision Temperature Control Kettle

This high-quality electric kettle is crafted from durable borosilicate glass, designed to withstand significant thermal shock. It features intelligent temperature control settings ranging from 70°C to 100°C, ensuring the perfect water temperature for various brewing needs. With built-in safety features like boil-dry protection and advanced STRIX thermostat technology, this kettle offers both performance and peace of mind for professional and home environments.

Technical Specifications

Safety Protections

Boil-dry protection • Overheat protection • Automatic shut-off

Power & Voltage 220-240V 60Hz 1850-2200W

Temperature Settings 70°C, 80°C, 90°C, 100°C

Keep Warm Duration 1 hour

Model Options

Available Capacities

| Model | Max Capacity |
|---------|--------------|
| Y6245GT | 1.0L |
| Y6239GT | 1.5L |
| Y6249GT | 1.7L |
| Y6302GT | 1.7L |

Design & Build

Ergonomic design with precise water level markings and temperature controls.

Key Design Features

- Cordless operation
- 360-degree rotation base
- Concealed heating element
- STRIX thermostat

Thermal Shock Resistance

150 °C
