

Textile Machine Needle Plate

This needle plate is designed for textile machinery. Constructed from durable metal, it features precisely drilled holes for secure mounting and accurate needle placement.

Product Overview

Industrial Precision Needle Plate

This precision-engineered needle plate is designed specifically for high-speed industrial textile machinery. Its robust metal construction and precisely drilled mounting holes ensure stable needle alignment and reliable fabric handling. The integrated raised circular section is optimized for superior stitch formation, making it an essential component for high-output textile manufacturing environments.

Technical Specifications

Primary Applications

- Industrial sewing machines
- Textile manufacturing lines
- High-speed sewing operations

Key Performance Features

Precision Drilled • Fabric Handling Optimized • Secure Mounting

Design Geometry

Square-shaped base with raised circular center section

Material

Durable Metal, Industrial Grade
