

Textile Machinery Accessories

Accessories are available for automatic controllers, electric motors, and ST/STC alternators. The product range includes items such as automatic controllers, capacitors, terminal boxes, fans, and voltmeters.

Overview

Professional Textile Machinery Components

This comprehensive range of high-quality textile machinery accessories is designed for reliability and seamless integration with electric motors and ST/STC alternators. The collection includes essential electrical and structural components such as automatic controllers, rectifiers, and rugged terminal housings. Engineered for professional industrial applications, these parts ensure optimal performance and longevity for your textile processing equipment.

Electrical Components

Included Electrical Parts

- Automatic controllers
- Capacitors
- Diodes
- Silicon rectifiers
- Voltmeters
- Indicators
- Switches

Mechanical & Housing

Mechanical Hardware

- Capacitor covers
- Terminal boards
- Fans
- Fan covers
- Electric brush stands

Terminal Box Materials

Plastic, Cast Iron

Compatibility

Target Equipment

Electric Motors • ST Alternators • STC Alternators
