

# Textile Machinery Control Switch 16A 250V

This robust component is designed for textile machinery. It is a control switch rated for 16A at 250V, suitable for industrial applications.

## Overview

### Industrial Control Solution

This robust control switch is specifically engineered for high-demand textile machinery environments. With a 16A 250V rating, it provides reliable switching performance for industrial equipment. The unit features durable housing and secure terminal connections to withstand the rigors of continuous manufacturing operations.

## Technical Specifications

### Rated Current

**16 A**

Rated Current

### Rated Voltage

**250 V**

Rated Voltage

### Model Identifier

Z501Z

## Design & Build

### Typical Application

Textile Machinery • Industrial Equipment

### Construction Features

Brass Terminals, Durable Housing, Mounting Holes
