Product Overview

Sleek black exterior with energy-efficient interior LED lighting.

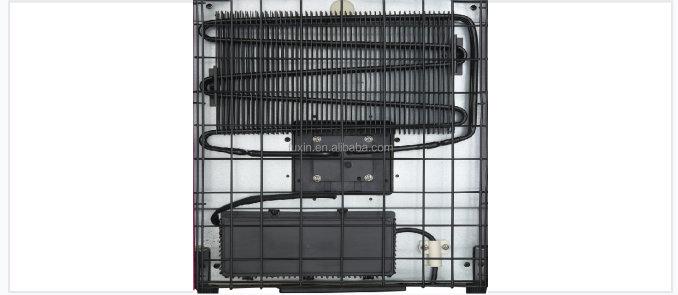

Efficiency Meets Comfort

This thermoelectric mini fridge is designed specifically for hotel environments, providing reliable cooling without the noise or vibration of traditional compressors. Its compact footprint makes it an ideal solution for guest rooms, offices, and small personal spaces. Environmentally conscious and energy-efficient, this unit ensures your beverages and snacks are kept at the perfect temperature.

Technical Specifications

Easy-to-use temperature adjustment with High, Middle, and Low settings.

Compressor-free thermoelectric cooling mechanism ensures silent operation.

Internal Volume	40 L
Temperature Range	5~15°C
Power Input	45 W
Voltage/Frequency	110V or 220V / 50-60Hz

Dimensions

Unit Dimensions (W*H*D)	420*575*420mm
Packing Dimensions (W*H*D)	475*630*470mm

Key Features

Key Features	Low Noise, Eco-Friendly, Compact, Energy Saving, No Compressor
