

# Thermostatic Radiator Valve with Liquid Sensor

This thermostatic radiator valve uses a liquid sensor to control temperature. It features a plastic head and is designed for use with radiators.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Temperature Control

This thermostatic radiator valve is engineered for precise temperature regulation in hydronic heating systems. Featuring an advanced liquid sensor and durable chrome-plated construction, it ensures consistent performance and longevity. The unit is certified to EN-215 standards and achieves an A-rating for energy efficiency, making it an ideal choice for both residential and commercial applications.

## Technical Specifications

### Energy Efficiency

A-Rating

Material	Hpb57-3 Brass
Finishing	Chrome Plating
Connection Size	15mm x 1/2"
Sensor Technology	Liquid Sensor
Compliance	EN-215

## Dimensions

### Valve Dimensions

Measurement	Value	Unit
Total Length	93	mm
Body Length	60	mm
Vertical Height	53	mm
Thermostatic Head Diameter	30	mm
