

# Thermostatic Radiator Valve with Liquid Sensor

This thermostatic radiator valve features liquid sensor temperature control. The head is constructed from plastic.

<b>Spec.</b>	1/2"
<b>Code</b>	B00082
	B00083
	B00084
	B00085

## ADDITIONAL IMAGES

## Overview

### High-Precision Temperature Control

This thermostatic radiator valve features a high-quality liquid sensor designed for precise temperature regulation in individual radiators. Manufactured and calibrated in-house according to EN-215 standards, it ensures reliable performance for both residential and commercial HVAC&R systems. With an A-rating energy grade, it provides an efficient solution for managing energy consumption while maintaining optimal indoor comfort.

## Key Performance Metrics

### Performance Highlights

**14 Years**

Years of Sensor Research

**215 EN**

Standard Compliance

## Technical Specifications

<b>Connection Size</b>	1/2" (R1/2")
<b>Pipe Diameter</b>	15 mm
<b>Sensor Type</b>	Liquid Sensor
<b>Available Models</b>	B00082, B00083, 00084, B00085

## Quality & Compliance

### Energy Efficiency Class

A-rating

### Certifications

EN-215

## Manufacturing Details

### Manufacturing Standards

- Full-automatic production line
- In-house liquid sensor manufacturing
- In-house head and body calibration
- 14+ years of specialized sensor research

## Dimensions

### Product Dimensions

Parameter	Value
Total Length	130 mm
Connection	R1/2"
Diameter	ø15
