

Threaded Button Drill Bit

These threaded button bits are designed for rock drilling applications. They feature tungsten carbide buttons for optimal performance and durability in various rock formations.

Product Overview

High-Performance Threaded Button Bits

These threaded button bits are engineered using high-quality alloy steel and premium tungsten carbides. Through specialized heat treatment, they are built to withstand the toughest rock drilling demands while transmitting intensive impact energy with minimal loss. Designed for versatility, they provide reliable performance across soft, loose-medium, and hard rock formations.

Technical Specifications

Available Thread Types	R22, R25, R28, R32, R35, R38, T38, T45, T51, ST58, T60, GT60
Diameter Range	127 mm

Logistics & Production

Packaging

- Wooden case
- Carton

Production Capacity

10000 pcs
Monthly Output

Key Features

Specialized Bit Variants

Button Bit • Retrac Bit
