

Threaded Pipe Nipple Fitting

This fitting connects pipes and hoses of varying diameters. It is available in steel, brass, and stainless steel with threaded and barbed ends for secure connections.

Overview

Versatile Threaded Pipe Nipple Fittings

These threaded pipe nipple fittings are engineered for secure and reliable connections in plumbing, irrigation, and fluid transfer systems. Available in a wide range of sizes and material compositions, they provide flexibility for diverse industrial and commercial applications. Designed for durability, these fittings ensure tight, leak-resistant seals across various piping configurations.
