

Threaded Socket Lamp Holder

This lamp holder features a threaded socket for secure bulb attachment. Its durable construction ensures longevity and reliable performance in various lighting applications.

Overview

Professional Lighting Component

This threaded socket lamp holder is designed for reliable and secure bulb installation in various lighting fixtures. Constructed from high-quality bakelite and copper, it offers durability and consistent performance for professional electrical applications. The design supports both E14 and E27 standards, providing versatility for different lighting needs.

Technical Specifications

Materials Used

- Bakelite
- Copper

Available Colors

Black • White

Compatible Base Types

E14, E27

Model Number

LXC-L750
