

Three-Core Electrical Cable

This is a three-core electrical cable with a white outer sheath. It contains blue, light blue, and gray insulated conductors and is suitable for powering appliances or lighting.

Product Overview

Three-Core Electrical Cable

This three-core electrical cable is designed for reliable power distribution in various electrical applications, including appliances and lighting fixtures. It features a durable white outer sheath protecting three internal insulated conductors. With clearly identified conductors and exposed copper ends, it is prepared for efficient and straightforward installation.
