

Three-Phase Digital Electricity Meter

This static three-phase four-wire watt-hour meter is designed for measuring electrical energy consumption. It features a digital display and LED indicators for phases A, B, and C.

Product Overview

Professional Three-Phase Energy Metering

This static three-phase four-wire watt-hour meter is engineered for precise electrical energy consumption monitoring in industrial and commercial environments. Designed for reliability and clarity, it features an integrated digital display for easy reading and dedicated LED indicators for phases A, B, and C to ensure real-time status monitoring. Built to comply with international standards, this unit provides a robust solution for energy management applications.

Technical Specifications

Key Performance Metrics

100 imp/kWh
Impulse Constant

Rated Voltage	3x230/400V
Current Rating	3x10(100)A
Frequency	50 Hz

Compliance & Standards

Compliance Standards	IEC61036-2000
----------------------	---------------

Features

Status Indicators

- Phase A LED
- Phase B LED
- Phase C LED

Display Type	Digital
