

Three-Phase Four-Wire Watt-Hour Meter

This three-phase four-wire watt-hour meter is designed for the accurate measurement of electrical energy consumption. It is suitable for industrial and commercial applications, providing reliable and precise readings.

Product Overview

Precision Energy Measurement

This three-phase four-wire watt-hour meter is engineered for high-accuracy measurement of electrical energy consumption in demanding environments. Designed for both industrial and commercial applications, it provides reliable and precise readings to ensure efficient energy management. Built to international standards, this meter is a dependable solution for monitoring power usage across various electrical systems.

Technical Standards

Compliance Standards	IEC62053-21
System Configuration	Three-Phase Four-Wire

Key Features

Recommended Use

- Industrial electrical monitoring
- Commercial energy consumption tracking

Manufacturing Origin

Made in China
