

Three-Phase Isolation Transformer

This three-phase isolation transformer features high efficiency and low temperature rise. It also has low vibration and noise, a flexible design, and is easy to install and remove.

Overview

High-Efficiency Three-Phase Isolation

This three-phase isolation transformer is designed for demanding industrial environments, providing reliable electrical isolation and stable voltage transformation. Engineered for high performance, it boasts an efficiency rating of 96% or higher and supports versatile power requirements from 3kVA up to 1000kVA. The unit is optimized for cooling and safety, ensuring durability and steady operation in communication, medical, and CNC machine applications.

Technical Performance

Power Range	3kVA - 1000kVA
Efficiency	96 %
Frequency	50/60Hz
Switching Frequency	2-20kHz
Noise Level	60 dB

Specifications

Cooling System

AN • FN

Insulation Class

B, F, H

Applications

Target Industries

- Communication
- Medical Equipment
- CNC Machine Tools
- Industrial Equipment

Key Features

Integrated Monitoring

- Voltage Meter
- Operation Indicator
- Electrical Hazard Warning

Design Enhancements

- Caster wheels for mobility
- Active cooling fans
- Ventilation slots
- Terminal block connections
