Product Overview

Professional Prepayment Energy Solution

This three-phase, four-wire prepayment energy meter is engineered for precise electricity monitoring and management in professional B2B environments. It incorporates a user-friendly keypad interface for seamless token entry and credit management. Compliant with international IEC standards, it provides high-accuracy energy measurement and reliable operation for commercial and industrial applications.

Technical Specifications

Impulse Rate

400 imp/kWh
Active Energy

400 imp/kvarh
Reactive Energy

Voltage Rating	380 V
Current Range	3x5(60)A
Operating Frequency	50 Hz
Accuracy Class	Class 1.0

Compliance and Standards

IEC Standards	IEC 62052-11, IEC 62053-21, IEC 62055-41
