

Three-Phase Prepaid Energy Meter

This three-phase prepaid energy meter is designed for accurate energy measurement and prepayment functionality. It is suitable for residential, commercial, and industrial applications.

Overview

High-Precision Three-Phase Solution

This three-phase prepaid energy meter provides accurate and reliable power measurement for residential, commercial, and industrial environments. Engineered for efficiency, it supports advanced prepayment functionality and remote monitoring capabilities to optimize energy management. Its robust design features tamper resistance and high-grade data communication protocols, ensuring secure utility control.

Technical Specifications

Rated Current

5 A

Base Current

20 A

Max Current

Model	DTS238-4
Accuracy Class	1.0
Rated Voltage	220 V
Frequency	50 Hz

Features

Core Capabilities	Prepaid Functionality, Tamper Resistance, Remote Monitoring, Digital Display
