

Three-Piece Stainless Steel Ball Valve with High Mounting Pad

This three-piece ball valve is designed with a high mounting pad for easy actuation. Constructed from stainless steel, it is suitable for use in oil fields and the chemical industry.

Product Overview

High-Performance Three-Piece Valve

This three-piece stainless steel ball valve is engineered for demanding industrial environments, offering robust construction and reliable flow control. Featuring an integrated high mounting pad, this valve is specifically designed to comply with ISO 5211 standards, ensuring seamless compatibility with actuators for automated systems. Its three-piece design allows for easy maintenance and repair without removing the entire valve assembly from the pipeline.

Technical Specifications

Mounting Standard

ISO 5211

Construction

Three-piece (3pc) bolted body

Material

Stainless Steel

Connection Type

Threaded

Features

Key Features

- High mounting pad for easy actuation
- ISO 5211 compliant design
- Durable stainless steel construction
- Three-piece design for simplified maintenance
