

Three-Pole Magnetic Contactor for HVAC

This three-pole magnetic contactor is designed for HVAC and refrigeration applications. It features robust construction and precise magnetic actuation for efficient switching.

Product Overview

Reliable HVAC Control

This three-pole magnetic contactor is engineered specifically for HVAC&R applications, offering robust performance in demanding environments. It features a universal metal mounting plate for easy installation and is built with superior copper coil construction to ensure longevity. Designed for efficiency, it provides reliable switching for air conditioning, refrigeration, and heating systems.

Technical Specifications

Contact Rating Range

20 A

Minimum Current

90 A

Maximum Current

Coil Voltage Range

24 to 600 VAC

Standards Compliance

ARI 780/790

Performance & Durability

Electrical Life Rating

- 100,000 Cycles
- 250,000 Cycles

Mechanical Life

1000000 cycles

Design Features

Key Features

Universal Metal Mounting Plate • Dust-free Internal Construction • Copper Coil • Position Independent Mounting
