

Three-Thread Overlock Sewing Machine

This three-thread overlock sewing machine is designed for overlocking and edge finishing on various fabrics. It operates at a moderate speed, balancing productivity with precision.

Overview

Professional Overlock Solution

The GN1-1 middle-speed three-thread sewing machine is a specialized industrial tool engineered for precise overlocking and edge finishing. Designed to balance operational speed with sewing accuracy, it creates durable, neat seams that effectively prevent fabric fraying. This versatile machine is an essential asset for garment manufacturing, textile production, and professional tailoring workshops seeking to enhance product quality.

Technical Specifications

Machine Type	Three-thread overlock sewing machine
Model Identifier	GN1-1

Performance

Operating Speed
Middle Speed

Applications

Primary Applications	Garment Manufacturing, Textile Production, Tailoring Workshops, Edge Finishing
