

Tie Rod End for Vehicle Steering Systems

This tie rod end connects the steering rack to the steering knuckle. It allows for precise alignment adjustments, ensuring optimal steering response and tire wear.

Product Overview

Precision Steering Performance

This tie rod end serves as a critical link between the steering rack and the steering knuckle in vehicle steering assemblies. Engineered for durability, it features a robust ball joint encased in a protective boot to ensure smooth articulation and resilience against road elements. The threaded design allows for precise alignment adjustments to promote optimal steering response and extend tire lifespan.

Technical Specifications

Package Contents

- Tie rod end unit
- Protective boot
- Installation nut
- Washer

Primary Function

Connects steering rack to steering knuckle for responsive vehicle control

Adjustment Mechanism

Threaded shaft

Key Features

Smooth Articulation, Durable Construction, Adjustable Alignment
