

Toothed Plastering Trowel

This plastering trowel is designed for applying and spreading plaster, mortar, or adhesive. The durable stainless steel blade features evenly spaced teeth for creating consistent grooves and ensuring optimal adhesion.

Overview

Professional Plastering Trowel

This high-quality toothed plastering trowel is designed for the efficient application and spreading of plaster, mortar, or adhesive. The tool features a durable carbon steel blade with precisely spaced teeth, ensuring consistent grooves for optimal material adhesion. Built for comfort and longevity, it includes an ergonomic handle to reduce fatigue during extended professional use.

Technical Specifications

Dimensions

120 mm
