

Top-Open Door Chest Freezer

This top-open door chest freezer features a foaming door for enhanced insulation. It provides ample storage space for frozen goods and ensures efficient cooling.

Product Overview

High-Efficiency Chest Freezer

This top-open chest freezer features advanced D-type evaporating pipe technology, ensuring a large heat exchange area and superior refrigerating efficiency. Designed for optimal food preservation, it consistently maintains temperatures below -18°C . With energy-saving performance that reduces consumption by up to 30%, this unit is a reliable solution for professional storage needs.

Model Capacity Table

Model	Net Capacity (L)	Door Count
XF-102	93	1
XF-152	140	1
XF-212	190	1
XF-252	230	1
XF-302	282	1 or 2

Design & Features

Door Functionality

- Top-open design
- Foaming door for enhanced insulation
- Hovering door mechanism (45-75° range)
- Solid door construction

Customization Options

Wire Basket, Plastic Basket, Divider, Cooling Pack, Door Lighting, Internal Fan, Nano Silver Anti-Bacteria Material

Mobility

Yes
