

Toroidal Power Transformer

This toroidal transformer features a compact design and high lamination space factor. It provides low vibration and noise, with flexible design options for easy installation.

Product Overview

High-Efficiency Power Solution

This toroidal power transformer offers a compact, donut-shaped core design that minimizes electromagnetic interference and reduces magnetic stray fields. Engineered for professional versatility, it provides exceptional voltage regulation and low-noise operation for sensitive electronic environments. It is a reliable, high-performance solution suitable for a wide range of industrial, medical, and telecommunication applications.

Technical Specifications

Power Range

10 VA

Minimum Power

30000 VA

Maximum Power

Standards Compliance

GB19212.1-2008

Insulation Class

B, F, H

Operating Parameters

Supported Input Voltages

- AC 220V
- AC 380V
- AC 400V
- AC 415V

Frequency

50-60 Hz

Applications

Suitable Industries

- Computers
- Medical equipment
- Industrial equipment
- Telecommunication equipment
- Lighting systems
- Household appliances
- Automatic control equipment
