

Touch-Free Automatic Hand Washer

This automatic hand washer features touch-free operation for hygienic use. It is designed for wall-mounted installation, making it suitable for both commercial and residential bathrooms.

Product Overview

Touch-Free Automatic Hand Washer

This advanced touch-free automatic hand washer is designed to enhance hygiene in commercial and residential environments by eliminating the need for physical contact. Featuring an intelligent infrared sensor, the unit automatically activates water flow and shuts off immediately after use, significantly reducing water consumption and preventing cross-contamination. With its durable, waterproof design and energy-efficient circuitry, this faucet offers a reliable, low-maintenance solution for modern washrooms.

Technical Specifications

Ambient Temperature

0.1 °C

Min Temp

45 °C

Max Temp

Water Pressure Range	0.05 MPa
----------------------	----------

Water Supply Pipe Size	DN15
------------------------	------

Sensor & Performance

Sensing Distance	20 cm
------------------	-------

Time Delay	0.5 seconds
------------	-------------

Auto Shut-off Duration	60 seconds
------------------------	------------

Power & Efficiency

Battery Type	4 x AAA
--------------	---------

Battery Life	Up to 2 years (at 200 cycles/day)
--------------	-----------------------------------

Key Features

Core Advantages

- Touch-free hygienic operation
- Water-saving intelligent sensor
- Advanced energy-saving circuit
- Waterproof sensor construction
- Battery low LED indicator
- Easy-to-clean internal strainer
