

Touchless Automatic Soap Dispenser

This automatic soap dispenser offers touchless operation. It features a refillable reservoir for dispensing liquid soap or sanitizer.

Product Overview

Hygienic Touchless Solution

This automatic soap dispenser offers a modern, touch-free handwashing experience suitable for offices, public spaces, and homes. Equipped with a precise infrared sensor, it ensures consistent dispensing while maintaining hygiene standards. The unit features a transparent reservoir for easy level monitoring and an intuitive LED indicator system for operation status.
