

Tourmaline Plate Hair Straightener

This professional hair straightener features tourmaline plates that produce negative ions, helping hair absorb moisture and reduce static. An advanced PTC heater allows the iron to heat up quickly and maintain consistent temperatures.

Product Overview

Professional Styling Performance

The JRI-066 Tourmaline Plate Hair Straightener is engineered for professional-grade results, featuring advanced tourmaline plates that emit negative ions to lock in moisture and eliminate static. Equipped with a high-performance PTC heater, this device achieves rapid heat-up times and maintains consistent styling temperatures for efficient use. Safety and longevity are prioritized through dual NTC and PCB temperature control systems, ensuring a reliable styling experience for all hair types.

Technical Specifications

Temperature Range

80 °C Min Temperature	230 °C Max Temperature
---------------------------------	----------------------------------

Plate Size	1 inch
Safety Systems	NTC Control, PCB Control, Dual Temp Regulation

Design & Ergonomics

Cord Design	360 degree swivel cord
Handle Ergonomics	Comfortable smooth handle

Key Features

Performance Highlights

- Tourmaline plates for negative ion generation
- Reduces hair static and promotes moisture absorption
- Advanced PTC heater for rapid heat-up
- Consistent styling temperature maintenance
